

# **RTank**

**Prefabricated  
Chemical Storage Tanks  
Ready immediately**

# Why choose a Fusion rTank?

Fusion Tanks are Water Corporation WA approved, come with a 25 year design life and are fully customisable.

Fusion rTanks are prefabricated to fast-forward the order-to-delivery time and reduce manufacturing costs.

This saving is passed onto you, producing a near-rotomoulded tank price, but with the added strength and high chemical resistance offered only by fabricated tanks.

## CORROSION RESISTANT

**Plastics can handle many highly corrosive chemicals.**

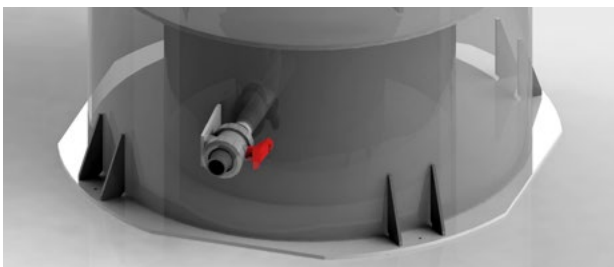

Fusion rTanks will never corrode and are highly chemical resistant.

## EASILY TRANSPORTABLE

**Self supporting, light weight and transportable with lifting lugs.**

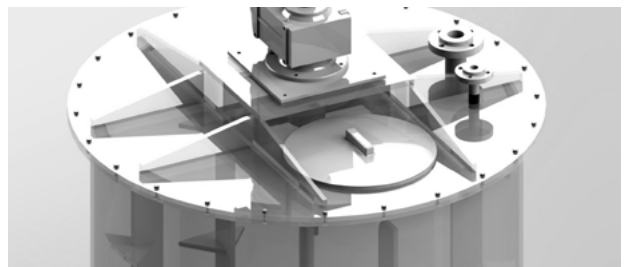

Fusion rTanks are fabricated in-house and then delivered to your site.

## 25 YEAR DESIGN LIFE

**Rest assured that our tanks will keep your site danger free.**

Fusion rTanks are tough; they're designed to last and be extremely resilient.

## COMPUTER AIDED DESIGN

**We predict operating conditions and performance.**

Using finite element analysis, all Fusion rTanks are designed to last.

# Sizes

1,500 L   2,500 L   5,500 L   10,000 L   13,000 L   16,000 L   19,000 L

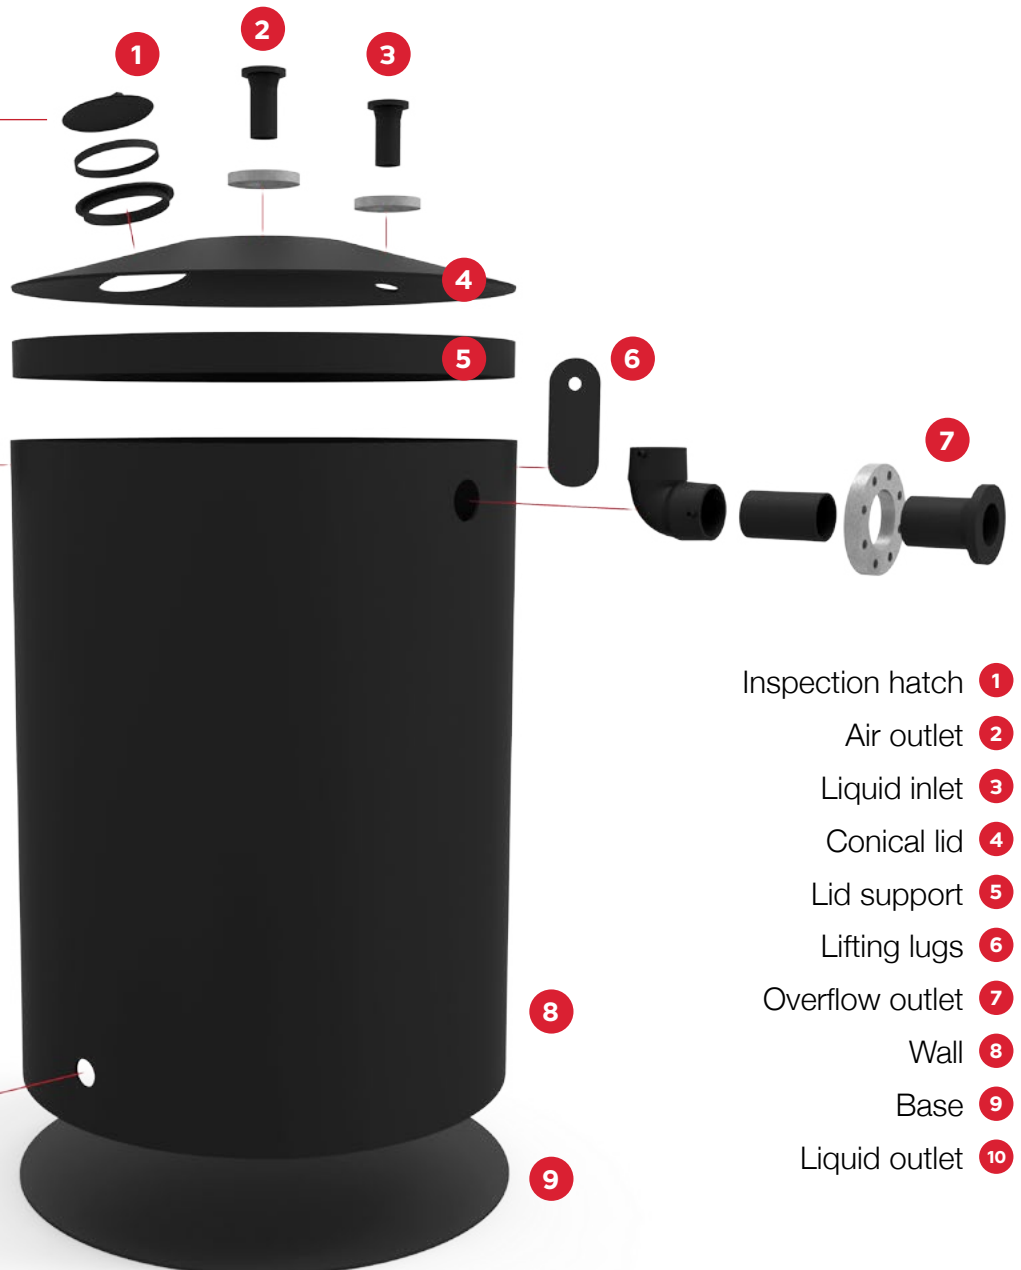

Size	Cylinder Height	Inner Diameter
1,500L	1.5m	1.15m
2,500L	1.5m	1.46m
5,500L	2m	1.91m
10,000L	2m	2.55m
13,000L	3m	2.39m
16,000L	3m	2.63m
19,000L	3m	2.86m

# Standard Parts

Internal access is achieved via a twist-open inspection hatch.

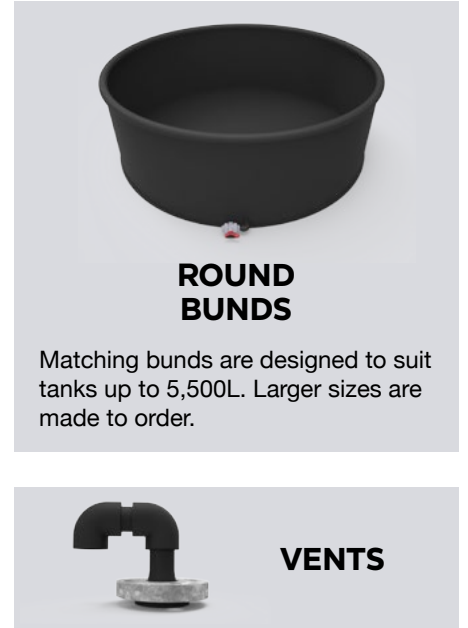

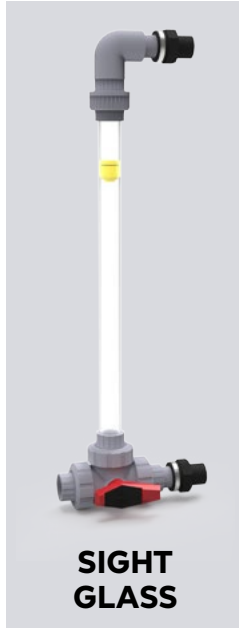

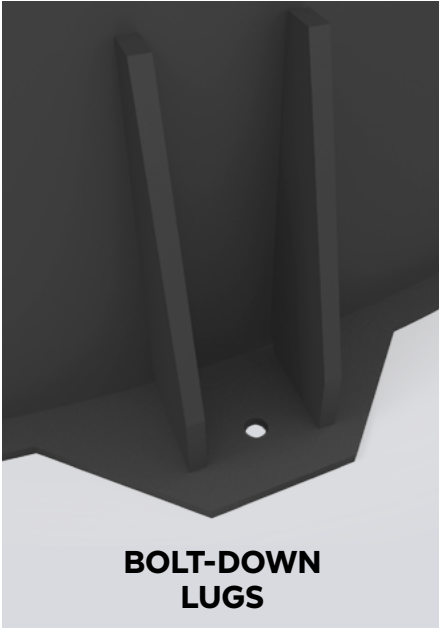

Easily transportable using external lifting lugs.

All come standard with inlets and outlets connectible to services via galvanised steel backing rings.

- Inspection hatch 1
- Air outlet 2
- Liquid inlet 3
- Conical lid 4
- Lid support 5
- Lifting lugs 6
- Overflow outlet 7
- Wall 8
- Base 9
- Liquid outlet 10

## Optional Extras

All optional extras are manufactured to suit Fusion RTanks.

## Fusion Tanks In Use

Fusion Tanks are already trusted and installed in most major water treatment plants throughout Australia.

Fusion RTank's chemical resistance and long life provide a safe solution for many varied applications in the harsh, corrosive environments often found in industrial locations.
