Insulating solutions for OEM's

Unex offers a wide range of solutions to meet the wiring requirements of mechanical engineering and machine building. The main features of Unex slotted trunkings for electrical, communications and automation cabinets are:

- **Higher safety for the installation assured by the trunking's sturdiness.**
- **The cover is easy to mount and remove and does not fall or slide in any mounting position.**
- **Two possibilities to cut the side of the trunking: either removing the finger or cutting until the base for better branching.**
- **Rounded fingers: no cutting tips or edges, avoiding damage to cables and personal injury, both during mounting and transportation.**
- **Easy to cut-off with the most common professional scissors.**
- **Electrical safety: insulating material.**
- **Fire safety:**
 - Glow-wire test at 960°C
 - Non-flame propagator: flammability test according to UL94:V0

Rigid cable retainer: avoids deformations and allows circuit classification.

Flexible and resistant fingers, which do not break accidentally.

Insulating plastic rivets, easy fastening

Clean cut of the sidewall to the base: maximum branching room and cross-section. Quicker mounting and easier cable connections.

Self-adhesive mounts:
Solid and durable fixings.

Complete solutions for cable conduction in production processes

Certified system

The quality of Unex solutions is guaranteed by the strict accomplishment of product and application standards, as well as by obtaining quality marks and approvals.
